AI PRODUCT MANAGER | SPECIALIST IN AGENTIC RAG & SCALABLE AI *Bridging the gap between Engineering feasibility and Product strategy.*

PROFESSIONAL SUMMARY

Results-oriented AI Product Manager with 4 years of technical experience in **Generative AI, Agentic RAG, and Predictive Analytics**. Proven track record of transforming complex AI research into high-impact business products, including an Agentic Data Enrichment system that reduced manual labor by **70%**. Expert in guiding cross-functional teams (Engineering, Data, Design) to launch 0-to-1 AI solutions. Creator of **RAGentX**, an autonomous agent framework. Deep technical fluency in LLMs and MLOps, enabling realistic roadmapping and precise trade-off decisions.

CORE COMPETENCIES

- **Product Strategy:** AI Roadmap Development, 0-to-1 Product Launch, Stakeholder Management, User Research, MVP Definition, KPI & Metric Tracking (Impact Analysis).
- **AI & Technical Depth:** Agentic Workflows, RAG (Retrieval-Augmented Generation), Large Language Models (GPT-4, Llama 3), Vector Databases (Milvus, Chroma), Prompt Engineering, Evaluation Pipelines (Ragas, TruLens).
- **Data & Analytics:** Forecasting (XgBoost/ARIMA/Prophet), Data Engineering (PySpark, Airflow), A/B Testing, SQL, Python.
- **Tools:** Jira, Confluence, Figma (Basic), LangChain, LangGraph, Azure DevOps, AWS SageMaker, Power BI.

EXPERIENCE

AI Engineer & Product Lead

[Vcreatek](#) | 📅 2023-01 – Present 📍 Pune, Maharashtra

Present Leveraged dual-hat role to lead product requirements and technical execution for enterprise AI solutions.

- 🛠️ **Product Strategy & Impact:**
 - Led the end-to-end product lifecycle for **EPRMate**, an Agentic AI system for packaging compliance. Defined user requirements, managed the backlog, and delivered a solution that **reduced data gaps by 90%**.
 - Identified a \$500K+ revenue recovery opportunity by conceptualizing a **Claim Recovery Engine**; translated complex legal contract logic into an NLP-based product feature.

- Launched **TEXTSPECTRUM**, a No-Code NLP platform. Conducted user research to identify non-technical pain points, resulting in a drag-and-drop interface that democratized AI insights for business teams.
-  **Technical Execution & Roadmapping:**
 - Orchestrated a cross-functional transition of a forecasting pipeline from Power BI/DAX to **PySpark**, improving processing speed and scalability for large retail datasets.
 - Designed the "**Human-in-the-Loop**" workflow for AI data enrichment, balancing automation (70%) with manual review to ensure 99% data accuracy for compliance audits.
 - Prioritized the roadmap for a **Space-Aware Assortment Optimizer**, successfully balancing technical constraints with merchandiser needs to reduce shelf-space waste by 18%.

RAGentX – Autonomous Agentic AI Framework | *Creator & Lead Developer An open-source initiative demonstrating forward-thinking product vision in the Agentic AI space.*

- **Product Vision:** Identified a market gap for "reasoning" agents that go beyond simple chat. Designed a system capable of planning, memory retention, and tool usage.
- **Architecture:** Built a multi-modal RAG system using **LangGraph** and **Vector DB**, integrating "Toolformer" style planning to allow agents to execute complex, multi-step tasks autonomously.
- **User Experience:** Developed a Trello-style UI (Streamlit/FastAPI) to visualize agent thought processes, making "Black Box" AI explainable to users.

INTERNSHIP

Data Science Intern

[Vcreatek](#)

 2023-06 – 2023-08 (3m)  Pune, Maharashtra

Developed a **GenAI Insights Dashboard** (with full python backend) for e-commerce, processing 100K+ reviews. Translated raw unstructured text into actionable visual product insights for stakeholders.

EDUCATION

 PGDM: Research and Technical Business Analytics -> 2021-23
[Prestige Institute of Global Management](#), Indore, MP

 Bachelor of Commerce -> 2017-2020
[Renaissance College of Commerce & Management](#)
