

Abhishek Singh

AI Engineer | Data Scientist

+91-7223933444 | [E-mail](#) | [LinkedIn](#) | [Website](#) | Pune, Maharashtra (open to relocate)

PROFESSIONAL SUMMARY

Strategic and hands-on **AI Engineer** with 3.3 years of work experience and 5+ years of domain experience driving next-gen innovation in **Generative AI, NLP, and Agentic RAG systems**. Creator of **RAGentX**, a smart autonomous assistant blending LLMs, memory, planning, and tool use for intelligent task execution. Skilled in building end-to-end AI solutions across forecasting, optimization, and GenAI-powered analytics.

Combines deep technical expertise with product thinking and system design to deliver AI that doesn't just scale — it **adapts, reasons, and creates**. Self-driven, outcome-obsessed, and always building what's next.

CORE KEYWORDS

Generative AI, LangChain, LangGraph, Agentic RAG, LLM, NLP, Prompt Engineering, Vector DBs, FAISS, Chatbot, FastAPI, Streamlit, OpenAI API, Embeddings, Transformers, Azure ML, Automation.

SKILLS

Languages: Python, SQL, PySpark

Libraries/Frameworks: Scikit-learn, XGBoost, LightGBM, PyTorch, TensorFlow, Pandas, NumPy

LLMs & GenAI: OpenAI API, LangChain, LlamaIndex, Hugging Face Transformers, Prompt Engineering, RAG

Agentic AI: LangGraph, CrewAI, AutoGen

Vector DBs: FAISS, Chroma, Pinecone

Deployment & MLOps: FastAPI, Docker, Git, MLflow, CI/CD, ONNX

Data Engineering & Automation: Apache Spark, Airflow, Azure Data Factory (ETL Automation), Snowflake, PostgreSQL, MongoDB

Cloud & DevOps: AWS (SageMaker, Lambda, S3), Azure, GCP (Vertex AI), GitHub Actions, Kubernetes

Visualization & Tools: Streamlit, Power BI, Plotly, Jira, Confluence

EXPERIENCE

AI Engineer | Data Scientist – Corp Tech (Team CVD)

[Vcreatek](#)

📅 2023-01 – Present 📍 Pune, Maharashtra

- 🔗 **EPRMate – Agentic Packaging Attribute Enrichment System:**
Built an agentic data pipeline to auto-enrich missing packaging attributes, enabling precise EPR fee calculation. Reduced data gaps by 90%, cut manual fixes by 70%, and boosted regulatory compliance. Leveraged rule-based logic, ML inference, and external product registries for intelligent attribute reconstruction.

-  **TEXTSPECTRUM – No-Code NLP App:**
Built a zero-code NLP platform powered by classical ML/NLP + OpenAI models, enabling non-technical users to extract insights from unstructured text. Key modules included sentiment analysis, topic modeling, classification, and a ChatGPT-like assistant.
-  **POS Forecasting Optimizer:**
Designed a retail sales prediction engine using ARIMA and Prophet with >92% accuracy. Automated deployment using Azure Data Factory with monitoring, triggers, and logging for seamless scheduling.
-  **Claim Recovery Engine:**
Created a GenAI-powered solution to validate deduction claims against contract clauses using NER and clause parsing. Enabled \$500K+ potential recovery through automation and policy compliance.
-  **TDP – Space-Aware Assortment Optimizer:**
Developed an ML + heuristic model to optimize product placement on shelves. Reduced 18% shelf-space waste and helped merchandisers identify high-impact assortment strategies.

Flagship Open-Source Project – RAGentX

Agentic AI Research & Execution Assistant | 2024 – Present

Built a full-stack GenAI assistant combining RAG, vector search, and long-term memory using LangChain, OpenAI, and Toolformer-style planning. Features autonomous task execution, API tools, and Trello-style UI built with FastAPI, Streamlit, and TailwindCSS.

EDUCATION

 PGDM: Research and Technical Business Analytics -> 2021-23
[Prestige Institute of Global Management](#), Indore, MP

 Bachelor of Commerce -> 2017-2020
[Renaissance College of Commerce & Management](#)
Indore, MP

INTERNSHIP

Data Science Intern (In-House POC)

[Vcreatek](#)

 2023-06 – 2023-08 (3m)  Pune, Maharashtra

E-Commerce Review Analytics – GenAI-Powered Insights Dashboard

- Built an end-to-end dashboard to summarize 100K+ customer reviews using scraping, NLP, and GenAI. Delivered visual insights through Power BI with sentiment trends and topic clustering.
- Applied advanced NLP techniques, including sentiment analysis, key-phrase extraction, topic modeling, and text classification, to derive actionable insights from unstructured text data.
